

# Caring for the Environment

## QUALITY ENVIRONMENTAL POLICY

Quddos have always been committed in supporting the environment and are now proud to have attained ISO accreditation as well as FSC accredited status.

We are constantly reviewing how we can help to reduce the harm caused to the environment without compromising quality or cost.

All Quddos paper and chemical waste is collected for recycling and all standard papers purchased are guaranteed from sustainable forests as well as being chlorine free.

Quddos is currently promoting 'print & plant' a new scheme that contributes back to the environment.

Our Top Management define this QUALITY, ENVIRONMENTAL POLICY, which is realised through the statements and procedures referenced throughout our policy manual.

The policy ensures that the documentation is appropriate to the nature, scale and environmental impacts of its activities, products and services, and also includes a staff understanding of meeting both the requirements of ISO 14001 and ISO 9001.

It is our policy to manage our business in the most environmentally responsible manner, complying with the relevant environmental legislation and regulations; and aiming to provide our customers with an on time and fault free reliable service.

We are committed to continuous improvement and the prevention of pollution, we only use registered waste carriers therefore ensuring that all waste is disposed of adequately, recycling and exceeding our customer's expectations wherever possible.

The management system provides a framework for the setting and reviewing of objectives and targets, to help support our continuous improvement and ensure our system is developed.

This policy is documented, implemented and maintained and communicated to all employees and sub-contractors through regular training of our responsibilities. It shall be displayed in a prominent position within the organisation and, in an area that is accessible by the public and reviewed regularly to ensure its continued suitability.
